

This week we have been learning how to count objects in 2's and 5's. Please can your child group the following objects by circling the right amount as asked in the question.

$$3 \times 2 = 6$$

Can you group the sets of objects into sets of 2?
Can you write the calculation?

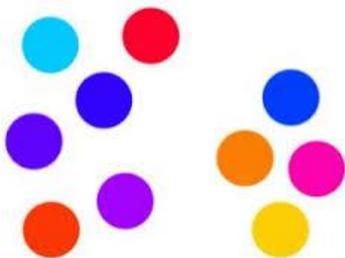

$$3 \times 2 = 6$$

Can you group the sets of objects into sets of 5?
Can you write the calculation?

Can you group the sets of objects into sets of 5?
Can you write the calculation?

Can you group the sets of objects into sets of 2?
Can you write the calculation?

Unless otherwise stated, we expect your child to complete this task independently. Please comment if you have supported or changed mistakes.
